André Yermak Naumenko

Telematics Engineer | Software & Data Engineering
Murcia, Spain | +34 695 91 16 09 | andrewyernau@proton.me
github.com/andrewyernau | yernau.com

Telematics engineer and Data Engineer with experience in heterogeneous-source integration and real-time data analysis. Develops software in Rust, Python and Java, including developer tools, backend APIs and machine-learning experiments. Administers self-hosted services and websites on Linux.

Experience

Setenova Oct. 2025 – Present
Data Engineer May 2026 – Present
Data Engineering Intern Oct. 2025 – May 2026

- Integrated and processed heterogeneous data sources for analysis.
- Analysed real-time protocol data and produced visualisations of traffic data.

Selected Projects

tmuxxer | Rust, Linux, tmux, fzf, Docker GitHub

- Co-developed a command-line tool that brings project directories, active tmux sessions and running Docker containers into a single interactive fzf picker.
- Supports creating, attaching to and switching sessions, and opening shells in running containers, to simplify navigation between development environments.

Chess Stylometry | Bachelor's Thesis, Python Grade: 10/10

- Investigated player classification from visual representations of chess data using a Siamese-network approach with anchor, positive and negative samples.
- Conducted literature research, implemented training improvements and evaluated experimental results over nearly a year; nominated for honours (Matrícula de Honor).

Backend API | Rust, Axum

- Built an API connecting a frontend to a database, integrating external APIs and validating registered users.

Minecraft Plugins | Java GitHub

- Developed several Minecraft plugins with different gameplay features, working with the server platform's APIs and plugin ecosystem.

Technical Skills

Languages: Python, Rust, Java, SQL, C, TypeScript, C#
Data: Pandas, NumPy, SQL/NoSQL, heterogeneous-source processing, data visualisation
Systems: Linux, Docker, Git, Bash scripting, server administration
Networking & integration: TCP/IP, RTSP, SNMP, MPLS, OSPF, VLAN, TLS/SSH

Education & Security Activities

Bachelor's Degree in Telematics Engineering 2021 – 2026
Polytechnic University of Cartagena
Retos UPCT, 2026: Second place, SmartEcoRutas heuristic route-optimisation challenge.
MITRE eCTF: Participant, Embedded Capture the Flag Apr. 2025
Talent4Cyber: Participant, cybersecurity event Oct. 2024

Languages

Spanish: Native | English: C1 (Cambridge) | Russian: Native | Ukrainian: Basic
